

UNDER SECRETARY OF DEFENSE
1100 DEFENSE PENTAGON
WASHINGTON, DC 20301-1100

COMPTROLLER

The Honorable Carl Levin
Chairman
Committee on Armed Services
United States Senate
Washington, DC 20510

SEP 16 2014

Dear Mr. Chairman:

In accordance with section 955(d) of the National Defense Authorization Act for Fiscal Year 2013 (Public Law 112-239), I am submitting the Department of Defense's report on its civilian personnel workforce and contracted services reductions for the Fiscal Year 2015 President's Budget. Subsequent reports will be submitted as part of the President's Budget submission to Congress. I am sending a similar letter to the Chairmen of the other congressional defense committees.

Sincerely,

A handwritten signature in blue ink that reads "Michael McCord".

CONGRESSIONAL REPORT

**The Department of Defense Report on the Civilian Personnel Workforce and Contracted Services
Reductions in the Fiscal Year 2015 Budget**

The estimated cost of this report for the Department of Defense is approximately \$4,280 for the 2014 Fiscal Year. This includes \$50 in expenses and \$4,230 in DoD labor.

REPORTING REQUIREMENT

In accordance with section 955(d) of the National Defense Authorization Act for Fiscal Year (FY) 2013 (Public Law 112-239), this report provides the Department's military manpower, civilian workforce and contracted services reductions provided in the President's FY 2015 Budget. Subsequent reports will be submitted as part of the President's Budget submission to congress.

As directed by section 955, the Department is committed to ensuring its civilian personnel and service contractor workforce are appropriately sized to support and execute the National Military Strategy, taking into account military personnel and force structure levels. The Department's challenge is to define the right mix of military, civilians, and contracted services needed to reflect new strategic priorities and evolving operational challenges. The Department's sourcing of functions and work among military, civilian, and contracted services must be consistent with workload requirements, funding availability, readiness and management needs, as well as applicable laws and guidance.

The size of the individual components of the Total Force is not always proportional to the others; the greatly varied missions of the Department require all three elements - military, civilian and contracted services - to perform a myriad of functions, including many that are predominantly civilianized. Moreover, in certain functional areas the size of the civilian workforce does not directly correspond to end-strength levels and the tempo of military operations. Currently proposed military end-strength reductions are predicated on revised defense strategy, changing geo-political priorities, increased international cooperation, and force structure changes. The Department's civilian and contracted support workforces perform key enabling functions for the operating forces, such as critical training and preparation to ensure readiness, equipment modernization and reset, medical care, family support, and base operating and infrastructure services - all vital services that support the men and women in uniform. Even during this period of constrained defense budgets, it is important to plan for sufficient numbers of federal civilian personnel to meet the support needs of the military forces. It is also important to ensure that military or federal civilians are performing all inherently governmental jobs, and that sufficient levels of civilians are available to perform critical oversight, management, and readiness functions of the Department.

Although section 955(c) requires the Department to report savings in the total funding for the civilian and service contractor workforce over the period from FY 2012 through FY 2017 relative to the savings in funding for basic military personnel pay achieved from reductions in military end strengths over this period, the Department does not project such funding beyond the budget year. Furthermore, the Department does not project the number of service contractors beyond the budget year.

In order to assess the Department's compliance with section 955(c) over the FY 2012 through FY 2017 period, the Department utilized its civilian full-time equivalent (FTE) and military average strength data over this time period. Using these data and the exclusions granted under section 955(c) results in an 8.9% reduction for civilians and 8.2% reduction for military over FY 2012 through FY 2017. Therefore, the Department is compliant with the intent of section 955(c). To assess contractor reductions, the Department examined the reduction in funding for contracted services over the period

FY 2012 through FY 2015. This resulted in an 8.2% reduction, meeting the FY 2017 goal in FY 2015. The detail data is provided in the following sections of this report.

CIVILIAN EXCLUSIONS GRANTED UNDER SECTION 955(c)

Under section 955(c), the Secretary of Defense may exclude expenses related to the performance of functions identified as core or critical to the mission of the Department, consistent with the workload analysis and risk assessments required by sections 129 and 129a of title 10, United States Code. Section 955(c) further specifies certain civilian and service contractor personnel that shall be considered by the Secretary in making a determination of core or critical functions, including those providing core logistics capabilities, financial audit services, maintenance and repair of military equipment, and medical services.

In accordance with section 955(c), the Department identified the following civilian personnel functions and associated FTEs over the FY 2012 through FY 2017 period as core or critical to the mission of the Department.

1/ Excludes National Intelligence Programs.

NUMBER OF MILITARY AND CIVILIAN PERSONNEL REDUCED

The Department utilized its civilian FTE and military average strength data over the FY 2012 through FY 2017 period to assess its compliance with section 955(c) regarding its civilian workforce savings over this time period. The Department's civilian FTE data exclude the Army's cemeterial expenses, the National Security Agency, and classified National Intelligence Programs. Its military average strength data include Active, Reserve, and National Guard.

Incorporating the exclusions granted under section 955(c), the Department's civilian FTEs are estimated to decrease by 8.9% over the FY 2012 through FY 2017 period. In comparison, the military average strength is estimated to decrease by 8.2% over this time period. Thus, the Department is compliant with section 955(c). The Department is committed to ensuring its civilian personnel are appropriately sized to support and execute the National Military Strategy while taking into account military personnel and force structure levels. Through the end of the FY 2015 President's Budget projection window in FY 2019, the Department projects its civilian FTEs decrease by 14.8%, which outpaces the 8.7% reduction in military average strength.

The Department's civilian FTE and military average strength figures over the FY 2012 through FY 2019 period are provided below.

3/ Assumes drawdown stops at Army Active End Strength (ES) of 450,000, Army Reserve ES of 195,000, Army National Guard ES of 335,000 and Marine Corps Active ES of 182,000.

CONTRACTOR REDUCTIONS

For measuring contract services funding limitations, the Department is measured against Section 802 (formerly Section 808) of the FY 2014 National Defense Authorization Act (P.L. 113-66), which directs the Department to limit contract services funding to the FY 2010 President's budget request for contract services plus growth in civilian personnel funding and transfers from the Overseas Contingency Operations (OCO) budget to the base budget since FY 2010. The Department was \$1.8 billion below the limitation in FY 2013, is \$3.4 billion below based on the FY 2014 enacted position, and is \$5.4 billion below based on the FY 2015 request.

Table 5 displays the contract services funding included in the Section 802 limitations as submitted in the March 2014 Operation and Maintenance Overview justification book. The FY 2015 President's budget request is 8.2% below FY 2012 actuals due to reductions in service support contractors and accepting short term risk in facilities maintenance contracts. The Department does not project contract services funding beyond the budget year.

Table 5. Section 802 Contract Services Funding FY 2012 - FY 2015

<u>Component (\$ in M)</u>	<u>FY 2012</u>	<u>FY 2013</u>	<u>FY 2014</u>	<u>FY 2015</u>
Army	12,707	15,445	12,834	13,846
Navy	13,124	13,308	11,657	11,483
Air Force	16,491	13,088	14,332	14,312
Defense-wide	15,486	13,809	13,964	13,440
Total^{1/}	57,806	55,650	52,787	53,081

1/ Excludes Overseas Contingency Operations funding

Excludes MILCON and RDT&E

Excludes medical contracts (25.6) and R&D contracts (25.5)

Excludes other intragovernmental purchases (25.3)

The Department continues to improve the projection of contracted services FTEs as required by section 235 of title 10, United States Code. The accuracy of the estimate of FTEs will improve as the Department implements an enterprise-wide approach to tracking contract expenditures and improves programming for contracted services. Components will gain a budget projection tool that connects completed reviews of their Inventory of Contracts for Services together with improved reporting on each service contract obligation to support improved total force planning.
